Event Survey System

How-To Guide for Users & Administrators

This guide explains how to submit event feedback as an attendee, and how to manage events, questions, branding, and analytics as an administrator.

Prepared: August 3, 2026

System: CAB Event Survey System ("Night Glass")

4. Troubleshooting & Tips	6

1. Overview

The CAB Event Survey System is a single-page web application used to collect attendee feedback after Canyon Activities Board (CAB) events and Student Markets. It has two audiences:

Attendees / Users	Submit feedback about an event they attended, including a star rating and a short set of questions.
Administrators	Log in with a password to manage the list of events, edit survey questions, update branding text, change the admin password, and view a results dashboard.

Two Survey Types

Every event configured in the system is tagged as either a **CAB Event** or a **Student Market**. The survey form automatically shows a different set of questions depending on which type of event is selected — you never fill out both.

The system is fully self-contained: all responses are recorded to a connected backend, and configuration (events, question wording, branding) is stored centrally so changes made by an administrator appear for every visitor immediately after saving.

2. Guide for Attendees (Taking the Survey)

No account or login is required to submit a survey. Simply open the survey link on any device — the form is optimized for both phones and desktop browsers.

1

Enter your Student ID

Type your Student ID number into the first field. This is required for every submission.

2

Select the event

Choose the event or Student Market you attended from the dropdown list. The form automatically switches to the correct question set (CAB Event or Student Market) once you make a selection.

3

Rate your experience

Tap or click the star rating (1–5 stars) to rate your overall experience.

4

Answer the remaining questions

Fields marked with a red asterisk (*) are required. For CAB events this includes whether it was your first time attending, how you heard about the event, your favorite part, suggested improvements, likelihood of returning, and whether staff connected with you. For Student Markets this includes your favorite part, whether it was your first market, satisfaction with vendor variety, and whether you made a purchase.

5

Add optional comments

The final “Additional comments” field is optional and can be left blank.

6

Submit

Click **Submit Feedback**. If any required field is missing, a message will prompt you to complete it. On success, you'll see a thank-you confirmation screen with a short celebratory animation.

7

Submit another response (optional)

From the confirmation screen, click **Submit Another Response** to fill out a new survey — useful for shared devices/kiosks at an event.

Tip: Every field with a red asterisk (*) must be filled in before the form can be submitted. The “Additional comments” field at the bottom is always optional.

3. Guide for Administrators

Administrators can manage everything attendees see on the survey form, plus review collected results, from a single Admin Console.

3.1 Logging Into the Admin Console

1**Open Admin Access**

Scroll to the bottom of the survey page and click the small **Admin Access** link in the footer.

2**Enter the password**

A login window appears. Enter the current admin password and click **Authorize & Login** (or press Enter).

3**Access granted**

On success, you're taken directly into the Admin Console and the footer link changes to read **Admin Console** for the rest of your session.

3.2 Event Management

The **Event Management** panel controls which events appear in the attendee dropdown, in what order, and whether each one uses the CAB question set or the Student Market question set.

Action	How to do it
Add an event	Type the event name into the "Event Name..." field and click Add .
Reorder events	Use the up/down arrow buttons next to each event to change its position in the dropdown list.
Mark as Student Market	Check the Market checkbox next to an event so it uses the Student Market question set instead of the CAB question set.
Remove an event	Click the trash icon next to the event to delete it from the list.

Changes in this panel are not saved until you click **Save All Changes** at the bottom of the Admin Console (see Section 3.5).

3.3 Global Branding & Password

The **Global Branding** panel controls the intro text shown at the top of the survey form, and lets you change the admin password.

- **Intro Text** — the welcome message attendees see above the survey form. Edit the text box to change it.

- **New Password** — leave blank to keep the current password. Enter a new value here to change it; it takes effect after saving.

3.4 Question Editor

Every question label shown on the survey form can be edited without changing any code. There are two separate editors:

- **Question Editor (CAB)** — edit the wording for the Student ID prompt, event selection title, rating question, first-time attendee question, “how did you hear about this event” options, favorite part, improvement suggestion, likelihood to return, and staff-connection question.
- **Question Editor (Market)** — edit the wording for the market rating question, favorite part, first-time attendee question, vendor variety satisfaction, purchase question, and the shared “additional comments” label.

Simply type new wording into any field — the attendee-facing form will display the updated text after you save.

3.5 Saving Changes

After making changes anywhere in the Admin Console (events, branding, password, or questions), scroll down and click **Save All Changes**. A confirmation toast (“Settings Updated!”) appears once the save completes, and the form reloads the latest configuration automatically.

Important: Save All Changes applies every pending edit at once — events, branding text, question wording, and a new password (if entered). If you navigate away without saving, your changes are lost.

3.6 Analytics Dashboard

Click **Analytics** from the Admin Console to open the results dashboard, which displays one card per event with:

- Average star rating and total number of surveys collected.
- Attendance figures and hosting team, when available.
- A short auto-generated summary of the feedback.
- **Search** — use the search bar to filter event cards by keyword.
- **Refresh** — click to pull the latest responses and configuration.
- **Settings / Survey View** — jump back to the Admin Console or the attendee-facing survey at any time.

To leave the Admin Console entirely, click **Exit Admin** to return to the public survey view.

4. Troubleshooting & Tips

Issue	What to check
"Please provide ID, Event, and Rating" message	These three fields are always required. Confirm a Student ID is entered, an event is selected, and a star rating is chosen before submitting.
"Please answer all required questions" message	Every field marked with a red asterisk in the active question set (CAB or Market) must be filled in.
"Incorrect Password" on admin login	Re-enter the admin password carefully. If it was recently changed by another admin, confirm the latest password with your team.
"Error connecting" or "Save Failed"	Check your internet connection and try again. If the problem persists, wait a moment and retry — the backend service may be temporarily unavailable.
Dashboard shows "No survey responses collected yet"	This is expected for events with no submissions yet. Click Refresh after new responses come in.
An event doesn't show the questions I expect	Check whether the event is flagged as a Student Market in Event Management. The Market checkbox determines which question set is shown.

Quick Reference

Who	Action	Where
Attendee	Submit event feedback	Survey View (default page)
Admin	Log in	Footer → Admin Access
Admin	Add/edit/reorder events	Admin Console → Event Management
Admin	Edit question wording	Admin Console → Question Editor
Admin	Change password / intro text	Admin Console → Global Branding
Admin	View results	Admin Console → Analytics
